

Course Roadmap

In this course, you learn about different types of AWS services, their capabilities, and how to appropriately map the right solution to each unique use case. You'll understand how to listen to a customer's cloud technology concerns, and how to best position the most efficient and cost-effective solution for their needs.

MODULE 01

Troubleshoot cloud-related issues

AWS infrastructure
AWS Support plans
AWS Support case

AWS re:Post
Troubleshooting mindset
Contacting technical support

MODULE 02

Troubleshoot AWS services

Amazon Elastic
Compute Cloud
(Amazon EC2)
AWS Lambda
Amazon Virtual Private
Cloud (Amazon VPC)

VPC Flow Logs
Identifying the root cause
Implementing solutions

MODULE 03

Troubleshoot scenarios

Amazon Relational
Database Service
(Amazon RDS)
AWS Identity and Access
Management (IAM)
AWS Organizations

Preventative measures
Best practices
Common customer
challenges
