

Choosing a Support Plan

The AWS Support plans are designed to provide the right mix of tools and access to expertise to aid customers in their success with AWS, while optimizing performance, managing risk, and keeping costs under control.

Basic

Recommended for account and billing questions, with access to self-service support methods, such as AWS Documentation.

Developer

Recommended for experimenting or testing in AWS.

Business

Minimum recommended tier for production workloads in AWS.

Enterprise On-Ramp

Recommended for production or business-critical workloads in AWS.

Enterprise

Recommended for business-critical or mission-critical workloads in AWS.

Support Plan Outlines

Basic

Included for all AWS customers

Customer service and communities
